Dear Participants of European Youth Championship ILCA 4 and Open European Trophy

In the face of growing problems related to climate change and environmental degradation, more and more initiatives around the world are striving to minimize the negative impact on the Planet. Every event, regardless of its size, has a social, economic and environmental dimension.

The ambition of the Polish ILCA Class Association is to build self-awareness among us sailors, for whom clean water, wind, lack of weather anomalies and the stability of the natural environment of the seas are of such fundamental importance. We must lead by example.

In this regard, I am kindly asking you to complete the training on the principles of responsible behaviour in accordance with planet-friendly practices during sailing regattas. The training, in the form of a short film – lecture "Sailors Friendly to the Planet", is available on <https://www.klasailca.pl/environmental-quiz>. After watching the film, please complete a simple survey. We will ask you to show confirmation of completing the survey during registration process, **so you need to remember the special number you will receive after completing the training and filling out the survey.**

Let's take care of our surroundings. Cleaning starts with us.

We wish you a lot of fun during the ILCA4 Youth European Championships and the Open European Trophy and keep my fingers crossed for your success in sports.
