

**For the first time we are proposing full tracking for each sailor at each race.
Instructions for Using Waterproof Bag**

1. Put the tracker into the bottom of the waterproof bag as shown in the picture

2. Press the waterproof strip tightly.

3. Fold the edge of the waterproof bag twice.

4. Open the side cover of the blue clip slot.

5. Insert the folded waterproof bag into the card slot.

6. Close the cover of the clip slot.

Setup on the Boat

Please place the fitted tracker inside the mast sleeve. Do not use tape if you are using an elastic mast sock.

There is 2 fleets for girls : Yellow and Blue

There is 4 fleets for boys: Yellow, Blue, Red and no sleeve.

For the fleet with no sleeve reverse one of your sleeve to the other side : White. We made that choice to have one mast sock less for each sailor (less 226 less mast socks) this is part of our sustainability project.

Daily Collection & Return

Locate your tracker number via the athlete list every day to collect the corresponding device. Please double-check that the number is correct after receiving your tracker.

On the first competition day, collect the waterproof pouch matching your tracker together with the device. **At the end of each competition day, only return the tracker for charging; keep the waterproof pouch with yourself.**

Upon completion of the final competition day, return both the tracker and the waterproof pouch.

Usage Instructions

After receiving the tracker, **do not press any buttons** or pay attention to **the indicator lights. We will verify that all devices function properly prior to distribution.**

If you encounter life-threatening danger out on the water, short-press the SOS button three times. When 4G signal coverage is stable, the race committee will dispatch rescue personnel to assist you.

Thank you
